Visiting Research Student at the Friedrich-Alexander-University Erlangen-Nuremberg

To whom it may concern:

I herewith confirm to host Mr. José Roberto Pérez Andrade at our chair of the Department of Computer Science of the Friedrich-Alexander-University Erlangen-Nuremberg during an exchange from 01/01/2011 to 31/07/2011 and as part of his PhD program in Mexico.

During his stay, Mr. Pérez will perform research in the area of "Invasive Computing", a novel paradigm for designing and programming future massively parallel computing systems. This new paradigm will require new programming concepts, languages, compilers, and operating systems as well as revolutionary architectural changes in the design of MPSoCs (Multi-Processor Systems-on-a-Chip).

More specific, new loop parallelization strategies and symbolic mapping techniques shall be developed which allow to generate parallel loop program implementations that have the ability to distribute their computations and communications at run-time on an array of tightly-coupled processors.

Mr. Pérez will perform research as part of his PhD studies at the Friedrich-Alexander-University-Erlangen-Nuremberg, but will take his doctoral examination in his home country. Moreover, he will finance his stay with a stipend of his home country. This will include any resulting travel costs to/ from Germany as well as other living expenses, and, in particular, health insurance.
Please note that the Central Office for International Affairs at our university can offer guidance concerning accommodation, reduced price travel schemes and reductions for students [Person to contact: Mr. Nikolas Kretzschmar (Counsellor for international Ph.D. students and researchers), mailto: nikolas.kretzschmar@zuv.uni-erlangen.de].

Yours sincerely,

Prof. Dr.-Ing. Jürgen Teich
Head of Chair
Tübingen, den 19. Oktober 2010

Invitation for Diana I. Escalona-Vargas

To whom it may concern

I would like to invite Mrs. Diana I. Escalona-Vargas to visit the MEG-Center during the period of Nov. 18th to Nov. 28th 2010. During this time we will evaluate possible collaborative project ideas. In addition she will attend the Autumn School on MEG and a conference on Lifelong Imaging during her stay in Tübingen.

If you have further questions do not hesitate to contact me directly.

Sincerely,

Dr. Hubert Preissl
Invitation for a scientific visit

I the undersigned, Bernard Girau, Professor at Université Nancy 1, member of the Cortex research team of INRIA Nancy Grand Est, and head of the INRIA associate team CorTexMex (collaboration framework between France and Mexico), certify that we invite José Hugo Barrón-Zambrano, PhD student at Cinvestav Tamaulipas, for a scientific visit. During his stay, from September 2. to October 30. 2010, José Hugo Barrón-Zambrano will extend his activities within the research activity program of the CorTexMex associate team, about:

- embedded central pattern generators,
- use of perceptive neural maps to generate control for CPG-based locomotion.

Yours faithfully,

Bernard Girau
